

New Haven's Early Childhood Program

teams with Little Scientists
and Improves Student's Cognitive Development.

The Creative Curriculum Child Developmental Continuum was administered three times during the 2003-2004 school year at the pre-Kindergarten programs in New Haven, Connecticut. This study compares 124 students who participated in the hands-on Little Scientists program with 127 students who did not participate in that program, noting the change in their development as measured by their teachers.
